1. Introduction

Game Overview

War Chronicle is a solo campaign game of conflict, endurance, and consequence. You command a **Host**, an army and its followers, on a three-year march toward **Middelalderen**, a once-great city whose influence still shapes the lands around it.

Middelalderen stood as a center of trade, learning, and faith, sustained by communities both within the city and throughout the surrounding lands. Over time, its institutions hardened. Knowledge, commerce, belief, and participation became increasingly controlled, and communities that no longer fit within those systems were gradually excluded from them. These communities, later labeled **Barbarians**, built new lives beyond the city's authority. Over time, they formed the distinct **Tribes** encountered throughout the region, carrying with them old knowledge, traditions, grievances, and memories of what had been lost. In excluding the communities that had helped sustain it, Middelalderen weakened the very systems on which it depended. Middelalderen diminished, but never ceased to matter. For this Host, the city is the campaign's objective.

The road to Middelalderen is built as you travel. Your Host crosses **Terrain** such as plains, forests, and mountains before reaching **Clearings**, the places where each stage of the march ends. Some Clearings are unclaimed, while others contain **Settlements** belonging to one of the Tribes inhabiting the region. Those Tribes may welcome you, tolerate your presence, demand payment for passage, or become openly **Hostile**. Your relationship with each Tribe is represented by **Rapport**, which can improve or deteriorate according to your actions.

Between marches, the Host makes **Camp**. There you may recruit soldiers, gather supplies, construct useful improvements and develop new military capabilities.

Throughout the journey, you will also respond to events, encounters, and other situations that arise both on the road and in Camp. You must manage more than an army. **Resources**, **Morale**, **Leadership**, and the passage of **Time** all matter. Some decisions also create **Echoes**, consequences that enter the campaign and may return later, sometimes long after the choice that caused them.

The Road Ahead

You will face moments that feel harsh, desperate, and occasionally unfair. That is intentional. Roads become dangerous, supplies run short, tribes remember how they have been treated, and Winter arrives whether the Host is ready or not.

But brutality is not the same as hopelessness. The campaign is built around hard choices, risk, setbacks, and recovery. You may find yourself surrounded by hostile tribes, short on Resources, bleeding soldiers, or limping toward Middelalderen with far less than you hoped to have when the march began. Your task is not to avoid every disaster, but to decide what can be risked, what can be sacrificed, what must be preserved, and whether the Host can keep moving. A campaign that goes badly is still a campaign, and the Chronicle is shaped as much by what goes wrong as by what goes right.

Campaign Premise and Objective

The campaign lasts for up to three years. Each year contains three active campaigning seasons, **Spring, Summer, and Autumn**, followed by **Winter**, when the Host must endure attrition and prepare for the coming year.

As the campaign continues, your choices determine the condition of the Host that reaches Middelalderen. Some campaigns will produce allies, while others will produce enemies. You may arrive wealthy and well supplied but short of soldiers, or with a powerful army held together by Leadership and Morale.

At the end of Autumn in the third year, the Host reaches Middelalderen and the **Finale** begins. To win **War Chronicle**, your Host must survive the journey and defeat Middelalderen's defending army. You lose if the Host is destroyed or its Morale collapses before victory is achieved.

Golden Rule

When a card's instructions contradict a general rule, follow the card. Card text is the authority for rules exceptions.

2. Components

[TBD]

Card Decks

Deck	Count	Primary Use
Terrain	24	Terrain type explored.
Explore	30	What happens on the way.
Arrival	20	What happens when you get there.
Camp	38	What happens while you are there.
Advancement	15	Developments and Tactics available during Refit & Reform.
Middelalderen Advancements	X	Developments and Tactics available to Middelalderen's Host

Component Limits

Player Units are limited by the supplied components. If an Archer, Infantry, Cavalry, Levy or Mercenary is not available in the supply, it cannot be gained, recruited, converted, or added to your Host.

All other components are not intended to limit play. If any other component is unavailable when needed, use a suitable substitute marker.

3. Core Concepts

The Host

The Host is the force you command. It includes Military Units, Levy, and special figures such as a Priest when available. The Host moves as a single force along the explored path. Units in the Host may be recruited, lost, converted, committed to battle, or otherwise modified by card effects.

Host limits: maximum 10 Military Units and maximum 6 Levy. A Priest does not count against Host limits.

Military Units and Levy

- Archers, Cavalry, and Infantry are Military Units.
- Levy are not Military Units. They are a separate pool represented by cubes.
- Military Units and Levy are always part of the Host.
- **Mercenary Units:** Mercenaries are temporary hired Military Units and do not count toward Host size limit. Hedge Knights are Mercenaries and count as Cavalry. Generic Mercenaries are Mercenaries and count as Infantry.
  - When a rule or card effect refers to, targets, or requires Cavalry or Infantry, Mercenaries that count as that unit type are eligible for that effect.
  - Mercenaries disband during Winter before Winter Refit & Reform.

Time and the Calendar

Time is the central pacing resource. Most actions cost Time. When the Time token crosses a season threshold, End of Season becomes pending. Finish the current phase, then resolve End of Season before continuing.

Each season uses an 11-space threshold. Exploring and actions from most Camp cards advance time, as well as other game effects as noted on cards.

Seasons and Years

Each year contains Spring, Summer, Autumn, and Winter. Spring, Summer, and Autumn are active marching seasons. Winter is a reckoning and reset period. The campaign ends when Autumn of Year 3 is crossed, at which point your Host has reached Middelalderen and the game Finale begins immediately.

Morale

Morale measures the Host's will to continue. Morale rises through victories, good omens, and faith. It falls through hardship, failures, shortfalls, and humiliation. Morale is used during *Winter Attrition* and in the Finale *Resolve Check* before the final battle. If Morale ever reaches 0, the game ends immediately in defeat.

Leadership

Before making a non-combat 2d6 test, you may spend 1 Leadership to roll 3d6 and keep the best 2 results. This is called Committing Leadership.

Before making a Morale d10 roll, you may spend 1 Leadership to roll 2d10 and choose 1 result.

You may spend a maximum of 1 Leadership this way per test or Morale roll. Leadership cannot be spent after the roll unless a card or rule specifically says otherwise.

Leadership cannot be spent on 1d6 rolls, First Contact rolls, Proselytization rolls, or any roll that specifically forbids Leadership. During Combat, Leadership may be spent as described in the Combat rules.

Resources, Coin, and Research

- **Food, Wood, and Stone** are physical resources carried in the Baggage Train.
- **Coin** is money and does not occupy Baggage Train capacity.
- **Research** is used primarily during Refit & Reform to buy Advancements or support Development effects.

Baggage Train

The Baggage Train limits how many Food, Wood, and Stone resources the Host can carry. During Harvest and other resource gains, use the *Open Staging* procedure to avoid unintentional errors.

Tribes and Rapport

Each tribe has a Rapport state with the player. Rapport can improve, decline, or collapse into Hostility. *First Contact* determines a tribe's starting disposition the first time it is encountered. When a tribe becomes Hostile, it can attack, raid, and seed Hostile Echoes into the Camp deck.

Tribes and Colors

Each Barbarian tribe is associated with a game piece color. Use these colors to match tribe settlements, Rapport markers, Hostile markers, and any tribe-specific tokens or reminders.

Tribe	Color	Tribe	Color
Nightstone Clan	⚫	The Quietus	🟣
Pale Hands	🔵	Sun-Touched	🟡

Clearings, Terrain, and Settlements

Terrain cards form the path of the march. During Mobilization, your Host explores Terrain, then arrives at a Clearing placed at the far edge of that Terrain.

Market Values

Food, Wood, and Stone each have a Market Buy value. Buy values are capped between 2 and 4, with Sell value equal to Buy value minus 2.

Tests and Dice Notation

A test is written as a target number such as 8+. Roll the indicated dice, normally 2d6 unless the rule states otherwise. If you Commit Leadership before a non-combat 2d6 test, roll 3d6 and keep the best 2 results. Then apply any applicable Tribe Rapport modifiers. If the final result is equal to or higher than the target number, the test passes.

Critical Success and Critical Failure

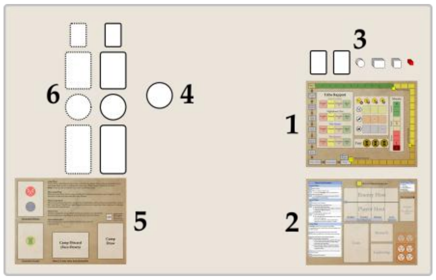
On a natural 12, the test is a Critical Success. On a natural 2, the test is a Critical Failure. Critical results apply unless a card or rule specifically says otherwise. Unless instructed otherwise, a Critical Success improves Rapport with the relevant tribe by 1, and a Critical Failure lowers Rapport with that tribe by 1.

When Leadership is committed before a test, determine critical results from the two base dice only.

Global Shortfall Rule

If an effect requires you to lose or pay something and you cannot fully do so, lose or pay as much as you can. For each missing unit of cost or loss, lose 1 Morale. This applies to resources, Coin, Leadership, Research, and Rapport unless a card says otherwise.

4. Setup



1. **Calendar**
   a. Place the Hourglass tokens on the Start of Year and Year 1 Spaces.
   b. Place the End of Season reminder tokens in their respective areas.
   c. Place the Resource tokens in the Market area on their starting spaces.
   d. Place Morale token on 5 on the Morale Track.
2. **Player Board**
   a. Place the Phase tracker token at the top of the Player Turn Procedure area, beginning with Mobilization.
   b. Receive 5 Coins, 3 Leadership tokens, 2 Levy and place them in their respective areas.
   c. Cover the 2 additional Baggage Train upgrade slots with orange cubes. These slots are unavailable until your Baggage Train is upgraded.
   d. Receive 2 Food, 1 Wood and 1 Stone, placing them in your Baggage Train area.
3. **Refit & Reform Offer**
   a. **Create unit pools:** Separate your Archers, Infantry, Cavalry and Levy in distinct piles.

   b. **Advancement card stacks:** Place the 3 Armor Development cards in their own area. Shuffle the remaining Advancement cards and place it in its own area with the top card revealed.

4. **Play Area:** Place a Vacant Clearing from the Clearing tile stack in the top-left of the Play area. Place one of your control markers and your Host token on the the Clearing.
5. **Camp Mat and Deck**
   a. Place the Camp Mat near the play area.
   b. Separate the different types of Camp cards into their own piles: standard Camp cards, Scenes and Echoes.
   c. Randomly add 2 Scene cards to the standard Camp cards, then shuffle them, forming the Camp Draw Deck.
   d. "Burn" 2 cards from the draw deck, placing them in the face-down Camp Discard area.
   e. Place the Camp Draw deck, unseeded Scenes, and unseeded Echoes in their respective areas on the Camp Mat.
6. **Remaining Card Decks:** Shuffle and place the following decks above the Camp Mat, leaving room next to each for their respective discard piles:
   a. Terrain deck
   b. Explore Deck
   c. Clearing tile stack
   d. Arrival Deck

Place remaining game tokens to the right side of the play area for easy access.

5. Game Structure

Year and Season Structure

The game is played over three years. Each year is a lap through the campaign calendar. Spring, Summer, and Autumn contain normal turns. Winter is resolved as a separate season of reckoning, attrition, consolidation, and preparation.

Turn Structure

Each normal turn is resolved in this order:

1. **Mobilization Phase**
   a. **Explore Step**
   b. **Arrival Step**
2. **Camp Phase**

The game begins with the Mobilization Phase.

Player Turn Overview

Phase / *-Step*	**What Happens**
Mobilization	Resolve the Explore Step, then the Arrival Step.
- Explore	Advance Time, draw and place Terrain, draw and resolve an Explore card, then move to Arrival.
- Arrival	Draw and place a Clearing. If Blank, take control and may *Forage*. If Barbarian occupied, resolve First Contact if needed, pay Tribute, then resolve the Arrival card.
Camp	Draw 3 Camp cards, resolve drawn Scenes/Echoes first, then choose and resolve **one** remaining standard Camp card, or *Work*.

End of Season Timing

When Time crosses a season threshold, place the End of Season reminder token in the play area. Finish the current **phase**, then resolve End of Season before continuing.

If End of Season triggers during the Mobilization Phase, finish both the Explore Step and the Arrival Step before resolving End of Season.

If End of Season triggers during the Camp Phase, finish the Camp Phase before resolving End of Season.

Exception: If Time crosses End of Autumn in Year 3, stop immediately and begin the Finale instead.

Winter Timing

When passing the End of Autumn space on the calendar, time stops. Finish the current phase, then resolve Autumn End of Season and proceed immediately to Winter.

If Autumn End of Season triggers during Mobilization, finish the full Mobilization Phase, including both the Explore Step and Arrival Step before resolving Autumn End of Season and Winter. When Winter is resolved, the next year begins with Time reset to the start of Spring.

Winning and Losing the Game

Winning the Game

You win by defeating Middelalderen in the Finale.

Losing the Game

You lose immediately if your Host is eliminated or if Morale reaches 0.

Your Host is eliminated if you have no surviving **Military Units, Levy, or Mercenaries**. Priests do not count as surviving units for avoiding defeat.

6. Mobilization Phase

Mobilization Overview

The Mobilization Phase represents the Host pushing farther along the road and resolving whatever it finds at the end. Mobilization has two steps:

1. **Explore Step**
2. **Arrival Step**

The Mobilization Phase is not complete until both steps are resolved.

6.1 Explore Step

1. Advance 2 Time.
2. Draw the top Terrain card and place it at the edge of the Host's current Clearing, extending the path.
3. Move the Host onto the new Terrain and draw the top Explore card.
4. If the Terrain type matches one of the Explore card's terrain keywords, resolve the Explore card, otherwise discard the Explore card without effect.
5. Proceed to the Arrival Step.

Scouting

If you have the Scouting Development, draw 2 Terrain cards instead of 1 when exploring. Choose 1 to place and discard the other then proceed with the Explore Step normally.

6.2 Arrival Step

The Arrival Step will usually require the player to perform one or more tests. Refer to the *Tests and Dice Notation* and *Critical Success and Critical Failure* rules in the ***Core Concepts*** section.

On a natural 12, the test is a Critical Success. On a natural 2, the test is a Critical Failure. Critical results apply unless a card or rule specifically says otherwise.

Unless instructed otherwise, a Critical Success improves Rapport with the relevant tribe by 1, and a Critical Failure lowers Rapport with that tribe by 1.

Arrival Procedure

1. Draw the top Clearing tile and place it at the end of the Terrain where the Host is located.
2. If the Clearing has no Barbarian icon, resolve *Vacant Clearing Arrival*.
3. If the Clearing has a Barbarian icon, resolve *Barbarian Clearing Arrival*.

Vacant Clearing Arrival

1. Place one of your control markers on the Clearing.
2. You may ***Forage***. To Forage, advance 1 Time and roll 1d6. On a 4-6, collect 1 resource matching the adjacent Terrain.
3. The Arrival Step ends.

Barbarian Clearing Arrival

1. Draw the top Arrival card.
2. Identify the tribe shown on the card.
3. If this is the first time you have encountered that tribe, resolve ***First Contact***.
4. After First Contact is resolved, check that tribe's current Rapport state:
    a. If the tribe is **Hostile**, resolve **Hostile Tribe Arrival**.
    b. If the tribe is not Hostile, resolve **Non-Hostile Tribe Arrival**.

First Contact

The first time the Host encounters each tribe, roll 2d6:

Roll	Starting Disposition
2-5	Hostile
6-10	Neutral
11-12	Friendly

Leadership cannot be spent on the First Contact roll.

If First Contact makes the tribe Hostile, do not resolve an immediate attack solely because of First Contact. Continue the current Arrival using the *Hostile Tribe Arrival procedure.*

Tribute During Arrival

When the Host arrives at a Barbarian Clearing, determine the required Tribute based on the tribe's current Rapport:

- **Neutral or Hostile:** Pay the Tribute printed on the Arrival card.
- **Friendly:** Ignore the printed Tribute. Instead, choose and pay one of the following: 2 Coin, 1 Food, 1 Wood, 1 Stone, or 1 Research.
- **Allied:** No Tribute is required.

When paying a printed Resource Tribute, you must pay the requested Resource if you have it. If you do not, you must instead pay Coin equal to that Resource's current Market Buy value +1.

If Research is required and you have no Research, you must pay 4 Coin instead. If Coin is required, there is no fallback payment.

If you cannot pay the required Tribute, follow the appropriate Non-Hostile or Hostile Tribe Arrival procedure.

Non-Hostile Tribe Arrival

Use this procedure if the tribe is Neutral, Friendly, or Allied.

1. Pay Tribute as described under **Tribute During Arrival**.
2. If you paid Tribute or no Tribute is required, continue to the card's **Choose 1** section.
3. If you cannot pay Tribute using either the requested payment or the Coin fallback, make a Rapport 8+ test, applying the tribe's current Rapport DRM.
    a. **Pass:** The tribe permits your Host to proceed. Continue to the card's **Choose 1** section.
    b. **Fail:** Lose 1 Rapport.
        i. If this makes the tribe Hostile, they attack. Enter Combat.
        ii. If the tribe is not Hostile, the Host is forced onward. Perform a **Forced Mobilization**.

Note: If you cannot pay the full Tribute using either the requested payment or the Coin fallback, do not make a partial payment and do not apply the Global Shortfall Rule. Proceed directly to the Rapport test.

Hostile Tribe Arrival

Use this procedure if the tribe is Hostile.

1. Pay Tribute.
2. If you cannot pay Tribute using either the requested payment or the Coin fallback, the tribe attacks. Enter Combat.
3. If you paid Tribute, make a Rapport 8+ test, applying the Hostile Rapport -1 DRM.
4. Resolve the result:
    a. **Pass or Critical Pass:** Gain +1 Rapport with that tribe, then continue to the card's **Choose 1** section.
    b. **Fail or Critical Fail:** The tribe attacks. Enter Combat.

Choose 1 Arrival Option

Most Arrival cards instruct you to **Choose 1** Arrival option. Choose one option and resolve it completely.

Many options require a test and list Pass and Fail results. Apply Rapport DRMs and critical results when performing tests unless otherwise stated.

Hostility After an Arrival Test Result

If the local tribe becomes Hostile after resolving an Arrival option, they attack. *Forced Combat*.

Attack

Attack is always an available Arrival option. Choosing to Attack is different from Combat forced by a failed test, Hostile Arrival, card effect, or other rule.

If you choose to Attack, the tribe immediately becomes Hostile and you enter Combat. If you later Disengage from this Combat, you must suffer the penalty listed in the Attack option.

Forced Combat

If you are forced into Combat, the outcome does not grant Attack rewards and does not impose Attack-specific Disengage penalties unless the card says otherwise.

Forced Mobilization

Some Arrival results force the Host to move onward instead of proceeding to the Camp Phase.

When instructed to perform a Forced Mobilization, immediately resolve a new Explore Step, then resolve the Arrival Step following that Explore Step. **The Scouting Development does not apply** during a Forced Mobilization.

A Forced Mobilization still spends Time normally, even if End of Season is already pending. **Exception:** If Autumn End of Season is pending, The time token does not advance while Forced Mobilization is resolved.

After the Forced Mobilization is complete, if End of Season is pending, resolve End of Season before continuing to Camp. Otherwise, proceed to the Camp Phase.

Capturing a Barbarian Settlement

If you defeat a tribe in Combat at a Settlement they control, replace that tribe's control marker on the Clearing with one of your control markers. Then add that tribe's Hostile Echo to the Camp discard pile. See *Capturing a Settlement After Combat* for more information.

Ending the Arrival Step

The Arrival Step ends after the current Arrival has been fully resolved, including any Combat, Disengage, Forced

Mobilization, or other forced movement caused by that Arrival.

After the Arrival Step ends, if End of Season is pending, resolve End of Season before continuing to Camp. Otherwise, proceed to the Camp Phase.

7. Camp Phase

Camp Overview

The Camp Phase represents what happens after Mobilization, while the Host pauses in its current location before the march continues. Camp cards may build civic capacity, recruit support, interact with the market, resolve camp scenes, or reveal consequences of earlier choices.

Camp Card Iconography

Icon	Represents	Icon	Represents
☀	Time Passed	●	Cost to Resolve

Drawing Camp Cards

Your **Work** card is always available and is never shuffled into the Camp deck, discarded, or removed.

Draw 3 Camp cards, forming your Camp hand for this phase. Including the Work card, your Camp hand will normally contain 4 cards.

Scenes and Echoes are resolved immediately in drawn order before choosing a standard Camp card, or Working.

When drawing, if the Camp draw deck becomes exhausted, shuffle the discard pile to form a new draw pile, burn 2 cards face down to the Camp discard pile and continue drawing your hand.

Scenes and Echoes

Scene and Echo cards are not optional. When drawn, resolve them as instructed. They may cost Time, add or remove cards, modify resources, or create consequences tied to earlier choices.

Unresolvable Scene Cards

If a Scene card is not resolvable because a required game state, target, or other element is unavailable, add 1 random card from the unseeded Scene deck to the Camp discard pile. Then shuffle the unresolvable Scene card back into the unseeded Scene deck.

A Scene card is **not** unresolvable merely because you cannot pay its cost, gain its full reward, or suffer its full penalty. In those cases, resolve as much of the card as possible and apply the Global Shortfall Rule if needed.

Hostile Echo

When a Hostile Echo is drawn, it immediately interrupts the normal Camp process. Advance the required 2 Time on the Calendar. Discard all other Camp cards in hand [†], then resolve the first Hostile Echo drawn. After resolving it, the Camp Phase ends. If more than one Hostile Echo is drawn, resolve the first one drawn and discard the others with the rest of your hand [†].

If the referenced tribe is no longer Hostile, return the Hostile Echo card to the unseeded Echoes pile. Time still advances and the Camp Phase still ends, representing the disruption of dealing with the old grudge.

[†] The Work card is never discarded.

Parley option

Each Hostile Echo has a printed **Parley** option. Parley requires a painful, tribe-specific large Tribute. If the Tribute is offered, make a Rapport 8+ test. Apply the normal Hostile -1 DRM.

- **Parley Success:** Set that tribe to Neutral. Return the Hostile Echo card to the unseeded Echoes pile.
- **Parley Failure or no Tribute offered**: The tribe attacks, enter *Combat*.

Choosing a Camp card

1. After all required Scenes and Echoes are resolved, choose 1 legal standard Camp card from your hand to resolve.
2. A card is legal only if the Host satisfies its Location requirement:
   a. Any Location: Any Clearing.
   b. Controlled Settlement: A Player Controlled Settlement. See ***Allied Exception for Camp Cards***
   c. Barbarian Settlement: A Neutral, Friendly, or Allied tribe Settlement.
3. Pay its Time and Cost.
4. Resolve its effect.
5. Discard or remove it as instructed by the card's footer.

Work

The Work card is always available. It is never discarded or removed. If you cannot play or choose not to play a standard Camp card, you must Work.

Work options: Advance 2 Time and:

- Gain 2 Coin, or
- Gain 1 Coin and 1 Leadership, or
- Spend 1 Wood to repair one Baggage Train slot.

The ***Camp Steward*** Development adds an additional option to the Work action; see **9. Buildings, Upgrades and Advancements**.

Adding Echoes

Some cards with the *Scene* keyword seed Echoes. If a Scene's outcome instructs you to add an Echo from a specific set of Echo cards, search through the set-aside Echo deck and locate the required set of cards then randomly add one to the Camp deck's face-down discard pile without looking at it.

End of Camp Cleanup

Discard unchosen cards as instructed by the current Camp Phase rules. The Work card is never discarded or removed.

8. End of Season

When End of Season Triggers

End of Season triggers when the Host passes the current season threshold on the Calendar. Place the End of Season reminder token in the play area, complete the current phase, then resolve the End of Season procedure before continuing.

If the Host is resolving Combat fallout, Disengage, Forced Mobilization, or another forced flight sequence, complete that full forced sequence before resolving End of Season.

After resolving End of Season, continue as follows:

- If End of Season triggered during the **Mobilization** Phase, resolve End of Season after the Arrival Step, then continue to the **Camp** Phase.
- If End of Season triggered during the **Camp** Phase, resolve End of Season after Camp, then the Player Turn ends.

The Player Turn tracker on the Player Board may be used to mark the current phase before resolving End of Season and to determine the phase in which play resumes afterward.

End of Autumn / Wintering Location

Winter cannot begin while the Host is in a Hostile Clearing. Once the Host is in a Player Controlled Settlement or a Neutral, Friendly, or Allied tribe Clearing, resolve Autumn End of Season, then Winter.

End of Season Procedure

1. Resolve **Vulnerability**
2. Resolve **Harvest**
3. Resolve **Supply Line Consolidation**
4. *End of Summer only:* **Refit & Reform**
5. Reset the End of Season reminder token on the Calendar. **Exception:** Do not replace the End of Autumn reminder token when resolved in Year 2, as there is no End of Season Phase after Autumn in Year 3.

Season Boundary Carryover

During a Game Year, Time continues to carry over across normal season boundaries, even if End of Season has already been triggered. If a rule or effect advances Time while End of Season is pending, continue advancing the Time token normally.

When Autumn ends, Time stops advancing while the player resolves the current phase. If Autumn ended during Mobilization, complete the full Mobilization Phase before resolving Autumn End of Season and Winter.

Vulnerability

There are 2 Vulnerability dice. The Market Vulnerability die and the Barbarian Activation die. Both are rolled during this step.

Market Vulnerability Die

The Market Vulnerability die always changes exactly one resource Buy value up or down, subject to the Market caps. Food, Wood, and Stone Buy values cannot go below 2 or above 4, and Sell values are always Buy value -2.

Barbarian Activation Die

If the result of the Barbarian Activation die shows a Barbarian icon, one Hostile tribe will Raid.

Barbarian Raid

If a raid occurs, randomly determine the raiding Hostile tribe if there is more than one. The raiding tribe takes control of the rear-most player controlled Settlement. Replace the Player's control token with one of the raiding Tribe's control tokens, with the Hostile side face-up.

If there are no Hostile tribes or no Player Controlled Settlements on the map, no Raid occurs.

Harvest

Eligible Terrain

During Harvest, Each Terrain card that is not adjacent to a Hostile tribe settlement will produce Resources. Terrain does not need to be connected to a Player Controlled Settlement to be harvested.

Resources Harvested:

- Plains: Produces 1 Food each
- Forest: Produces 1 Wood each
- Mountains: Produces 1 Stone each

Open Staging Procedure

1. Place all newly harvested resources in an open staging area, not directly into the Baggage Train.
2. After all harvested resources have been staged, you may purge any number of Resources currently in your Baggage Train.
   a. If you have built a Market, apply its effect. You may sell up to 2 purged resources from your Baggage Train, collecting coins in the amount of their current Market ***Sell*** value. Additional Resources beyond those sold may still be purged without further compensation.
3. Receive choice of staged Harvested resources into available Baggage Train spaces, returning any unchosen harvested resources to the supply.

Baggage Train Capacity

Food, Wood, and Stone must fit in the Baggage Train to be retained after Harvest. **Each slot in the Baggage Train holds up to 2 Food or 1 Wood or 1 Stone.**

Supply Line Consolidation

Starting from the Host's current location, count backward along the explored path. Keep the first 2 Clearings behind the Host and discard all Clearings beyond them. Then discard all Terrain not connected to at least 1 remaining Clearing.

Refit & Reform

Refit & Reform occurs only during End of Summer and during Winter. It does not occur during End of Spring or End of Autumn.

During this step, you may recruit new units into your Host, and purchase Tactics and/or Developments from the Advancements available in the Refit & Reform offer.

Recruit Units

Recruit	Cost	Recruit	Cost
1 Archer	1 Coin	1 Infantry	2 Coin
1 Cavalry	2 Coin + 1 Food	Up to 2 Levy	1 Food

Host size limits must be respected (up to 10 Military Units and 6 Levy). Note that existing generic Mercenary Infantry units and Hedge Knights do not count toward this limit.

Research and Advancements

Research Tokens are generally part of the purchase cost of Advancements. Advancements include Developments and Tactics. Developments are persistent effects. Tactics are effects used during Combat.

Buying Advancements

1. The 3 Armor Developments are always available, and the top card of the Advancement deck is available for purchase.
2. Pay the listed cost and place the card near your Player Board.
   a. If you purchase the top card from the Advancement deck, reveal the next card. This card is now available as well.
3. You may pay 1 Coin to discard the top of the Advancement stack and reveal the next card.

Armor and Weapons

Armor adds shield tokens that can prevent casualties. Other Developments in the Advancement deck improve offensive performance of specific unit types in Combat.

9. Buildings, Upgrades and Advancements

Buildings

There is only one of each building type in the game:

Market

Allows for the sale of up to 2 Resources from your Baggage Train prior to collecting resources from Harvest. Acquired via the 'Frontier Works' card.

Academy

When receiving a Research Token, roll 1d6. On 4-6, gain +1 additional Research Token. Acquired via the 'Sacred Foundations' card. Leadership may **not** be applied to this roll

Chapel

Grants access to a Priest and their special abilities. Acquired via the 'Sacred Foundations' card. When built, place the Chapel building token in your Player Board's Developments area, and your Priest token in the Host area on your Player Board.

The Priest is a support unit. It cannot be chosen as a Combat casualty, does not count against Host limits, and does not count as a surviving unit for avoiding defeat.

Priest abilities and related rules appear in the sections where they are resolved:

- Proselytization *(see Combat)*
- Modify Winter Attrition loss *(see Winter)*
- Modify Leadership loss/gain during the Finale Setup Resolve Check *(see Finale)*
- The Quietus Priest *(see Rapport and Tribes)*

Baggage Cart (Upgrade)

The Baggage Cart upgrade increases Baggage Train capacity by two slots. The Frontier Works card includes Baggage Cart as one of its build options. During Setup, unavailable Baggage Train spaces are covered with reminder tokens until upgraded.

Developments

Developments are persistent Advancements. Once acquired, their effects are immediately applied.

Scouting

During the Explore Step, draw 2 Terrain cards and choose 1, discarding the other. Acquired via the 'Field Staff' card.

Camp Steward

When you choose the Work card during the Camp phase, resolve 1 normal Work option as normal. You may then choose 1 additional Camp Steward option:

- Spend 1 Coin to collect 1 Resource matching the adjacent Terrain, or
- Buy 1 resource from the Market for 1 Coin less than its current Buy value (minimum 1 Coin).

Armor

Each Armor Development provides 1 Shield for Military Units. Remove a Shield to prevent 1 casualty assigned to a Military Unit during Combat. Replenish all Armor Shields after Combat. Acquired from the Advancement offer.

Weapons

Acquired from the Advancement offer:

- **Longbows:** Provides a +1 DRM to all Archer attack dice
- **Stirrups:** Provides a +1 DRM to all Cavalry attack dice
- **Halberds:** Provides a +1 DRM to all Infantry attack dice

Tactics

Tactics are acquired from the Advancement offer and are deployed to the battlefield during Combat. Some Tactics cards have a Leadership cost to deploy.

10. Combat

When Combat Occurs

Combat occurs when a card or rule instructs a tribe or enemy to attack, when the player chooses Attack, or when the player fails certain Hostile Arrival procedures.

Forced Combat vs Attack

Arrival cards will always allow you to choose **Attack** as an option. This is different from Combat forced by a failed test, Hostile Arrival, card effect, or other rule. If you choose Attack, you may earn the rewards listed under the Attack option, but if you later Disengage from that Combat, you suffer the listed Attack penalty. Forced Combat does not grant Attack rewards and does not impose Attack-specific Disengage penalties unless instructed otherwise.

Disengaging from Combat

When Combat begins, at least 1 full Combat round must be resolved before the player may Disengage.

Cavalry Pursuit: If the enemy Host includes Cavalry when you Disengage, the enemy Cavalry performs one free attack round at -1 DRM.

Enemy Force

Whether attacking or being attacked, use the Enemy Host shown on the current card.

Combat Round Procedure

If Combat is initiated by a Hostile Echo, you may Parley before Combat begins. See **Parley option** under **Hostile Echo** in the Camp Phase section.

When entering Combat, you may commit available Tactics to the battlefield, paying associated Leadership costs.

After rolling attack dice for a unit type, you may spend 1 Leadership to reroll any 1 die. You may spend a maximum of 1 Leadership this way per unit type per Combat round. Leadership may also be spent to deploy or resolve Tactics and card effects that specifically require Leadership.

Priest Proselytization

Before the first round of Combat, check whether either Host includes a Priest. If exactly one Host includes a Priest, that Host may attempt Proselytization. If both Hosts include a Priest, the Priests cancel each other out and no Proselytization occurs.

To Proselytize, roll 1d6. On a 5–6, convert 1 enemy unit in this order: **Levy → Infantry → Archers → Cavalry**.

Remove the converted unit from the enemy Host and set it aside; they do not participate in the current Combat. **Converted units do not count as surviving units when determining Combat defeat.** If the converting Host survives the Combat, add the converted unit to that Host after Combat, respecting Host limits. Any converted unit that cannot be added because of Host limits is removed instead.

Leadership may not be spent on this Proselytization roll.

Combat Round:

Both sides roll their attack dice simultaneously per unit class.

1. All Archers Attack
2. All Cavalry Attack
3. All Infantry Attack
4. All Levy Attack

A maximum of 6 dice per unit type can be rolled in a round. Tactics that add dice cannot exceed this cap.

Casualty Assignment

- **Archers:** hits on **6+.** Apply hits to largest enemy Unit; the Host ***receiving*** the casualty chooses ties†.
- **Cavalry:** hits on **4+.** Apply hits to largest enemy Unit; the Host ***inflicting*** the casualty chooses ties†.
- **Infantry:** hits on **5+.** Apply hits to largest enemy Unit; the Host ***receiving*** the casualty chooses ties†.
- **Levy:** Levy rout on a result of 1 and hit on a result of **6.** Apply ***Levy Rout*** for both sides before assigning Levy hits.
    - Levy hits target a specific enemy unit class until none remain, then move to the next unit class. Levy hits target enemy units in this order: **Levy → Infantry → Archers → Cavalry**.

For hits inflicted by **Military units**, hits are assigned one at a time, recalculating largest Unit type for each hit.

- Defending **Military Units** *may* remove a **Shield token** if available via the Armor Development to absorb a hit. Levy units cannot absorb hits with shield tokens.
- Return casualties to the supply.

†Making Casualty Choices for the Opponent

When a rule gives the opponent a casualty choice, make that choice in the opponent's favor.

- If the opponent is choosing a casualty from **your Host**, choose the legal option that is most harmful to your Host.
- If the opponent is choosing a casualty from **its own Host**, choose the legal option that best preserves the opponent's fighting strength.

If two or more choices seem equally strong or equally harmful, choose randomly.

Levy Rout

When Levy roll their attack dice, return 1 Levy for each result of 1 to the supply. After resolving Levy Rout for both sides, assign Levy hits.

Armor / Shields

Each shield token may be removed to prevent 1 casualty that would be **assigned to a Military Unit during Combat** only.

Victory and Defeat

If the enemy force is destroyed or routed, you win the Combat. If you initiated the Combat, receive any rewards listed. If you initiated the Combat and your Host has Disengaged, pay any penalty listed. If your Host is destroyed, the campaign is lost. Game over.

A Priest does not count as a surviving unit for purposes of avoiding defeat. If your Host has no surviving Military Units, Levy, or Mercenaries/Hedge Knights after Combat, your Host is defeated, even if your Priest remains.

Capturing a Settlement After Combat

If Combat occurs at a Settlement controlled by the tribe you are fighting and you win, replace that tribe's control marker on the Clearing with one of your control markers.

Then take that tribe's Hostile Echo from the Unseeded Echoes stack and add it to the Camp discard pile. Hostile Echo IDs begin with **A**, followed by the tribe's initial: **AN, AP, AQ,** or **AS**.

Hostile Echo Combat

Hostile Echoes are revenge attacks against your Host, not always territorial battles. Combat caused by a Hostile Echo does not allow you to capture a Settlement controlled by another tribe.

If a Hostile Echo occurs at a player-controlled Settlement and you Disengage, replace your control marker on that Clearing with the attacking tribe's control marker. Otherwise, Settlement control does not change.

11. Rapport and Tribes

Rapport States

Rapport states include Uncontacted, Hostile, Neutral, Friendly, and Allied. A tribe can move between these states through First Contact, Tribute, Arrival options, card effects, and attacks.

Gaining Rapport

When an effect grants +1 Rapport, move that tribe one step upward on the Rapport track.

Losing Rapport

When an effect causes -1 Rapport, move that tribe one step downward. If Rapport reaches Hostile, the tribe becomes Hostile. Resolve any attack or Combat only if the current card, phase, or rule instructs you to do so.

Effects of Rapport

The state of your Rapport with a tribe may provide +/- die roll modifiers (DRM) to Arrival tests related to that tribe. Rapport DRMs do not affect Combat attack rolls.

Rapport	Modifier	Rapport	Modifier
Allied	+2 DRM	Friendly	+1 DRM
Neutral	0 DRM	Hostile	-1 DRM

Hostile Rapport

A Hostile tribe may attack during the Arrival Step, raid during Vulnerability, and generate Hostile Echoes. Attacking a peaceful tribe sets their Rapport to Hostile. Hostile Tribes impose a -1 DRM for all tests related to that Tribe.

Hostile Tribes also block adjacent terrain from being Harvested. When a Tribe becomes Hostile, flip their control token to its *Hostile* side. Flip the token back over when the Tribe is no longer Hostile.

Hostility After an Arrival Test Result

If the local tribe becomes Hostile after resolving an Arrival option, they attack. *Forced Combat*.

Allied Rapport

An Allied tribe may grant special benefits on Arrival Card effects, and grants a +2 DRM on all tests related to that Tribe. Paying Tribute is not required when arriving at an Allied Tribe's settlement.

Allied Exception for Camp Cards

For Camp cards that require a **Controlled Settlement** location, an **Allied tribe's Settlement** also satisfies that location requirement.

Friendly Rapport

A Friendly Tribe grants a +1 DRM on all tests related to that Tribe. When arriving at a Friendly Tribe's settlement, you may choose and pay one of the following: 2 Coin, 1 Food, 1 Wood, 1 Stone, or 1 Research.

Neutral Rapport

Does not provide a DRM.

The Quietus Priest

Some Arrival results may allow an Allied Quietus tribe to send a Priest to accompany your Host.

A Quietus Priest remains in your Host only while The Quietus remains Allied. If The Quietus stops being Allied, remove the Quietus Priest from your Host.

If you are accompanied by a Quietus Priest and later build a Chapel, replace the Quietus Priest with your own Priest.

Leadership Spending on Tests

Leadership may only be committed before non-combat 2d6 tests or Morale/Resolve d10 rolls unless a card or rule specifically says otherwise.

To Commit Leadership before a non-combat 2d6 test, spend 1 Leadership before rolling, roll 3d6, and keep the best 2 results.

To Commit Leadership before a Morale/Resolve d10 roll, spend 1 Leadership before rolling, roll 2d10, and choose 1 result.

Leadership cannot be spent on First Contact, 1d6 rolls or Proselytization.

12. Winter

When Winter Occurs

Winter occurs after the Autumn End of Season is fully resolved. If Autumn of Year 3 ends, the Finale begins instead of a Winter Phase.

Winter Procedure

1. Disband Mercenaries.
2. Resolve Winter Attrition.
3. Reset Morale.
4. Refit & Reform.
5. Defeat Check.
6. Camp deck Winter reset.
7. Stabilize Market.
8. Advance the Year marker and begin next Year.

Disband Mercenaries

Return any Mercenaries from your Host to the supply.

Winter Attrition

Before rolling for Winter Attrition, you may spend 1 Leadership to roll 2d10 and choose 1 result. Otherwise, roll 1d10. If the result is higher than current Morale, lose units equal to the difference.

Remove losses in repeating order: **1 Levy → 1 Infantry → 1 Archer → 1 Cavalry**. Continue repeating this order until all required losses have been removed.

Priest Modifier

If your Host has a Priest, after determining Winter Attrition losses, prevent the loss of **1 unit of your choice** from among the units that would be lost.

Reset Morale

Reset the Morale token to 5.

Refit & Reform

See *End of Season: Refit & Reform.*

Defeat Check

If no units remain in your Host, lose the campaign.

Camp Deck Winter Reset

Move the remaining Camp draw pile to discard, seed it with 2 new random Scene cards, shuffle to form a new draw pile, then burn 2 cards to the face down Camp discard pile.

Stabilize Market

Adjust each Resource in the Market 1 space toward its starting value.

Advance the Year marker

Begin the next game year with the Mobilization Phase.

13. Finale / Middelalderen

Reaching Middelalderen

Middelalderen is the final objective of the march. When Autumn of Year 3 ends, the campaign reaches Middelalderen and the Finale begins.

Finale Trigger

As soon as the hourglass token crosses the End of Autumn space in Year 3, resolve the effect of the card or action that advanced the hourglass token, ten stop the current turn immediately. Do not finish the current phase, even if the Host is in the middle of Mobilization. Do not continue to the next phase, and do not resolve End of Season. The Finale begins at once.

Host Resolve Check

Before making the Host Resolve Check, you may spend 1 Leadership to roll 2d10 and choose 1 result. Otherwise, roll 1d10 and compare it to current Morale. If the roll is lower than Morale, gain Leadership equal to the difference to a maximum of +3. If the roll is higher than Morale, lose Leadership equal to the difference, to a maximum of -3. If equal, no effect.

Priest Modifier

If your Host has a Priest, apply the following after resolving the Finale Resolve Check:

- if you would lose Leadership, lose 1 fewer Leadership;
- if you would gain Leadership, gain 1 additional Leadership. This additional Leadership may exceed the normal +3 maximum.

Finale Setup

Remove all cards from the Camp mat and flip it over to the battlefield side.

Deploy your Host

1. Place your units in the appropriate lanes on the battlefield
2. Place Leadership tokens in the appropriate area.
3. Place any Shield tokens available via Armor Developments in the appropriate area
4. Spend Leadership to deploy any acquired Tactics to their appropriate areas.

During the Final Combat, Leadership may be used normally, including Combat rerolls and the deployment or resolution of Tactics and card effects.

Deploy Middelalderen’s Host

1. Deploy the following units in their appropriate lanes on Middelalderen’s side of the battlefield.
   a. 2 Archers
   b. 2 Cavalry
   c. 6 Infantry
   d. 6 Levy
2. Deploy Middelalderen’s Advancements: Draw 3 cards from the Middelalderen Advancements deck.
   a. If Middelalderen receives a unit-specific Advancement, apply the Advancement to the matching lane and add +1 matching unit to Middelalderen’s Host.
   b. Middelalderen can gain a maximum of +1 Archer, +1 Cavalry, and +1 Infantry from Advancements. If multiple Advancements apply to the same unit type, apply all Advancement effects, but add only +1 unit of that type.
   c. If Armor is drawn, apply the Armor effect.
3. Resolve the Final Combat to completion using the standard Combat rules.

14. War Chronicle and Age of Quarrel

War Chronicle is a standalone **Companion Vignette Game** set in the world of **Age of Quarrel**, a multiplayer grand-strategy game of competing powers, armies, diplomacy, development, and war. War Chronicle explores the smaller stories within that larger setting, focusing closely on people, places, and events that Age of Quarrel views from a broader strategic scale.

In Age of Quarrel, players struggle to shape the future of the realm through military, political, and economic power. Middelalderen is an important and valuable objective, but control of the city is only one possible path to victory.

Where Age of Quarrel views the conflict from above, with armies moving across the realm and powers competing for influence, War Chronicle follows one such army at ground level. Its march toward Middelalderen becomes a campaign of its own, shaped by the Tribes encountered along the road, the Resources consumed, the soldiers gained and lost, and the consequences of decisions made along the way.

The two games share a setting, history, places, and terminology, but **War Chronicle is completely standalone**. No knowledge of Age of Quarrel is required to play. Age of Quarrel tells the broader story of powers struggling to shape the realm. War Chronicle tells one smaller story within that age: the Chronicle of a single Host and its road to Middelalderen.
